

100 Free Backlinks

100 Free Backlinks

100 Backlinks is sometimes all it takes to make a huge difference in your search engine rankings.

I have ranked dozens of sites at #1 and in the top 3 in Google with brand new domains fresh out of Godaddy by using my power backlink building techniques.

Here are a couple sites offered for proof from a couple of highly competitive and profitable search terms I ranked #1 in less than 6 months

Very Tough SEO Search Terms

#1 – increase web traffic

#1 – increase targeted traffic

#2 – increase website traffic

<http://increasetrafficrank.com>

Very Competitive Fitness Keywords

#1 – fat loss workout

#1 and #2 gaining the double listing – boot camp workout

<http://www.bootcampexercises.net/>

Competitive Ranking in under 4 weeks

#4 – profile backlinks (this took only 4 weeks – 30-60 days it will be #1)

<http://profilebacklinks.org/>

#9 – 3DTV

<http://3dtvreviewstore.com/> (2 weeks to page 1 – profile links only)

This is a small snippet to prove to you that I walk the walk and get results. I'll start to share my secrets so that you can create proof of your own that these strategies and backlinks work.

These 100 backlinks are actually enough to get a low competition keyword ranking on page 1.

There are 2 major key points on using a small number of backlinks to rank on page 1

#1 – onsite SEO – this PDF is not about onsite SEO but I recommend the [SEOPressor](#) plugin and I use it on all my sites to double check my posts and pages as being highly relevant to the backlinks.

#2 – You must also get all of these links crawled and indexed through various means such as pinging, meta indexing, or [Backlink Energizer](#) or [Backlink Booster](#) (I use both).

Many people will build 100 or 200 backlinks and see no results. I run their links through an index checker and find that Google only found 5 or 6 of them on it's own. You must help Google find them!

SEO Automation Tools

It can take a lot of time to manually build links. I am a big user of SEO automation tools. Don't think of them as spammy, think of them as doing the work of 100 VA's for you. Can you afford 100 VA's?

Probably not, but you are likely to be able to invest some money into saving a lot of time that could be used doing other things.

[Nuclear Link Blaster](#) – one of the most powerful and includes a powerful ping scheduler

SEO Software Recommended by Rick Porter

SEO Software for Link Building

[SEO Link Robot](#)

[SE Nuke](#)

[Nuclear Link Blaster](#)

[Bookmarking Demon](#)

[Article Marketing Robot](#)

SEO Software for Link Indexing

[Backlink Energizer](#) is an incredible WordPress Plugin that builds [backlinks](#) to your [backlinks](#) giving them raw power. When you use Backlink Energizer you won't actually have to build nearly as many [backlinks](#) as before because you will have such a higher indexing ratio and you'll need less backlinks overall to achieve your search engine rankings.

[Backlink Booster](#)

SEO Software for Article Spinning

[The Best Spinner](#) is exactly as the name states – it is the BEST SPINNER! It has the hugest real world thesaurus that makes spinning readable articles a breeze. Other cool features are you can spin your articles and post direct to your WordPress blogs right from the spinner. Nice when you have 5 or 6 blogs in the same niche – spin and submit right from The Best Spinner panel.

You can also add your Copyscape key and check to see if your spun article passes Copyscape before submitting it to article directories that will reject it. SE Nuke recently added a feature where you can add your Best Spinner username and password and spin right from the SE Nuke interface. Try The Best Spinner for only \$7 for a week and see how this powerful SEO software will give your articles a lot of submission mileage.

SEO Software for Onsite Search Engine Optimization

[SEOPressor](#) is a WordPress plugin that has taken the blogging and internet marketing community by storm. SEOPressor will score your posts and pages to let you know if they are worthy of top rankings. SEOPressor has a built in algorithm to tell you what you need to add like H2, H3, and gives you real-time data on what your keyword density is so that you can either raise it or lower it. SEOPressor is a must have plugin to make your job easier when creating excellent content that will beat out your competition.

SEO Software for Keyword Research

[Market Samurai](#) is an extremely valuable tool to narrow in on your niche market and pick the right keywords. Don't pick keywords that have either too much competition or not enough traffic. Market Samurai is an outstanding piece of SEO Software that can help you find just the right keywords so that you can start making money as soon as possible. You can also track your search engine rankings and your competitors rankings.

If you don't own a good keyword research tool this is something you can try free for 14 days. During the free trial of Market Samurai I highly suggest you go through their free training videos. The free training videos will teach you not only how to use Market Samurai but it will also show you what is important when choosing your keywords which is very valuable whether you decide to buy Market Samurai or not. This is our SEO Software we use each day to research keywords, track our clients rankings, and watch the competition.

SEO Software for Email Marketing

[Pop Up Domination](#) is another great WordPress plugin that allows you to create very scalable and simple Pop Up optins so that you can start building your list. You may have noticed the pop up on the way into our site. You may think pop ups are annoying but they work. Having good SEO software for building a list is an absolute must if you are a serious internet marketer that really wants to build relationships and make money online.

[aWeber](#) is simply a place where you can store all of those email addy's. By using aWeber you can setup followup messages that go out when you want them to and you can send out broadcast emails to your entire email list. aWeber is a must for the serious email marketer.

SEO Software for RSS Submissions and Syndication

[RSS Submit](#) is the most powerful RSS Submission software on the market. RSS Submit can submit your RSS Feeds to over 100 RSS sites. If you are a power RSS marketer this is the best SEO Software you can get for RSS. I have found the RSS modules in SE Nuke and SEO Link Robot to work very well also and they will do just fine but if you don't have an all in one solution like SEO Link Robot and you do a lot of RSS I would suggest giving RSS Submit by Ksoft a try. Try it free to see how it works.

[Web Traffic Genius](#) is a WordPress Plugin with some amazing features. Web Traffic Genius will automatically submit you blog posts to RSS. It takes each post and actually creates an RSS Feed for submission then submits it automatically. This is a fantastic solution for autobloggers and is also does some nice automatic backlink building at the same time.

SEO Software for Autoblogging

[Blog Blueprint](#)

[ABS – AutoBlogging Software](#)

If you have any specific questions on any of this software or how I use it you can email me at:

rickporter@rickporter.org

Good luck with your link building efforts!

Your List of Free Backlinks

I have included the HTML code and BBC code that you need in order to place your links in most sites.

I don't recommend more than 2 links on each site for a couple reasons

1. Admins are more likely to delete your profile if you look like a spammer
2. Google doesn't like indexing pages that are low on content and full on links – keep the links low for better indexing and cache rates.

HTML Code:

```
<a href="http://www.YOURDOMAIN.com">YOUR KEYWORDS</a>
```

BBC Code:

```
[url=http://www.YOURDOMAIN.com]YOUR KEYWORDS[/url]
```
